ABSTRACT

A connection (4) between two parts (2, 3), in particular in a motor vehicle. The two parts (2, 3) are connected to one another in a connection zone (5) via a plastic connection (6) consisting of an injection-molded plastic (8). Additionally, the two parts (2, 3) are connected to one another in the connection zone (5) via an adhesive connection (7) consisting of a cured adhesive (9).
